Southeast
COMMUNITY COLLEGE
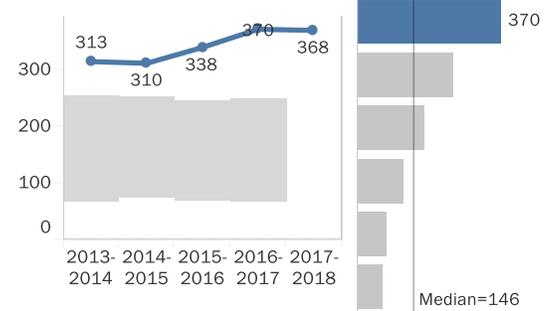

Strategic Metrics and Peer Comparisons

In November 2018, Southeast Community College released the third annual Strategic Planning Annual Report. Several metrics in the report were drawn from information that is reported to other agencies or organizations for compliance or benchmarking purposes. Because these data are available for other schools, we have peer data to provide context for SCC's performance. The metrics shown in this document are those drawn from the Human Resources collection from IPEDS. The specific metrics are: (1) number of full-time faculty employed; (2) number of full-time staff members, which *includes* administrators, professional staff, and support staff members, (3) the percent of faculty who are full-time, and (4) the percent of employees who are faculty members.

For each metric, this document shows (1) the values for SCC with a blue line, (2) the range of values for each peer group (Nebraska colleges, CCPE-defined peers, and IPEDS-defined peers) using a grey bar, and (3) the institution-specific values for the most recent complete year with SCC shown in blue. The availability of these metrics for peer schools is always delayed since IPEDS must review, validate, and compile the data before it is made available. For this reason, we have 2017-18 data for SCC but not the peer schools. Similarly, institutions have the option to forego reporting IPEDS HR data in even years; some peers did so.
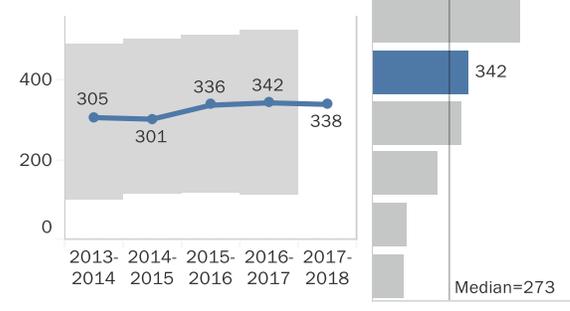

SCC and Nebraska Colleges

The blue line shows the trend for SCC. The grey shows the trend for the range of values for Nebraska Colleges.

Full-time faculty headcount — 313, 310, 338, 370, 368; 2016-2017: 370; Median=146

Full-time staff headcount — 305, 301, 336, 342, 338; 2016-2017: 342; Median=273

Percent of faculty who are full-time — 45.4%, 43.8%, 48.6%, 49.8%, 51.5%; 2016-2017: 49.8%; Median=43.8

Percent of employees who are faculty members — 65.1%, 65.5%, 64.0%, 62.8%, 61.3%; 2016-2017: 62.8%; Median=50.
