

General Education Requirements

Role/Mission of General Education - Students who earn a degree from Southeast Community College should exhibit both breadth and depth of knowledge. Therefore, SCC requires a General Education component in all degree programs. The goal is to provide all students, in both career and transfer curricula, a common, broad-based, well-rounded educational experience.

Every Program of Study requires students to take General Education classes as well as Program Core classes. To complete an associate degree, whether it is of applied science, arts, science or occupational studies, a student must successfully complete a minimum of 22.5 quarter credits from general education requirements. Students should contact the program advisor to select general education courses from each category area which will meet that program's graduation requirements. Transfer students should also work closely with the school to which they plan to transfer.

The associate degree* requires at least one *Oral Communication and one *Written Communication course, plus one course from three of the other five areas. A Certificate program must complete one course from the seven general education areas, and a Diploma program must complete one course from two of the seven general education areas. One exception is the Professional Truck Driver Training Certificate.
