**Chemical-Free Beekeeping
Methods with the Top Bar Hive**
Presenter: Corwin Bell

Pathogens or Beneficial Microbes?
Presenter: Laurie Ramona Herboldsheimer
 The microbial ecosystem within the hive includes over 8,000 different types of microbes.

What role do microbes have in a healthy honeybee colony? What effects do treatments in the hive have on this complex balance?

Ramona will share her research, insights and questions on this fascinating and grossly understudied subject.

**Treatment Free Beekeeping:
Challenges and Difficulties**
Presenter: Dean Stiglitz
 What are issues that a beekeeper will face should he decide to stop chemical treatments?

Disease, management, breeding, production, marketing, and politics are all part of beekeeping and there are special considerations to give all of these topics when treatments are not used.

Dean will present his perspective on these issues followed by a question/discussion period.

**Natural Cell Size and Its
Implications to
Varroa Mites**
Presenter: Michael Bush
 Discover how to regress to small cell management.
