
**SOUTHEAST COMMUNITY COLLEGE
ASSOCIATE DEGREE NURSING PROGRAM
TRANSFER STUDENT ADVANCED STANDING ADMISSION CRITERIA**

Nursing courses transferred from another institution will be evaluated on a case-by-case basis. There is not a guarantee they will apply towards the Associate Degree Nursing program. The Associate Degree Nursing Program Admission and Progression Committee will determine which nursing courses will be accepted for equivalent courses at Southeast Community College.

The student will be required to take one-third ($1/3=36$ credits) of the total college credits from Southeast Community College and complete the program within five years (Refer to Program Completion)

The student planning to enroll in the Associate Degree Nursing Program from a Registered Nursing Education Program must:

- Submit evidence of “good standing” with nursing program. Evidence must include a signed letter from the nursing program dean or director stating that the student has complied with all policies and guidelines of the nursing program and is regarded to have full access to nursing courses at the present time.
- Submit college(s) and nursing catalog with a listing of the curriculum
- Submit all official transcript(s), course outline(s) and syllabi that are 5 years old or less.
- Comply with all other admission requirements of the ADN Program and Southeast Community College (Refer to Program Admission information found on college website).
- Upon admission, the Admission and Progression committee will review the student file for evaluation and validation of comparability of the student course work to the content taught in each nursing course in the Associate Degree Nursing Program. Faculty who teach comparable courses will review materials for acceptable credit and deficiencies.
- The Admission and Progression Committee will make recommendations to the faculty organization for credit and placement of the student within the curriculum. Repetition of NURS courses will be determined based on:
 - Time frame since last successful nursing course
 - Repetition of nursing courses/withdrawal from nursing courses/nursing courses with a grade < B (80).
- Entry into nursing courses will be dependent upon availability of instructors, clinical resources and space. Students will be prioritized by entry request (first come, first serve basis) if the applicants exceed space available.
