

Attend a Course at SCC via Robot!

Robots are an emerging technology that are being used in many ways, including distance learning. SCC has robots that can be checked out to attend classes and other events. Students can attend classes in Lincoln, Milford, or Beatrice while they are at a learning center, their home, or another location.

Am I eligible to use the robot to attend a course or meeting on campus?

- Do you live in a rural area, either within or outside of the SCC service area?
- Do you drive a long distance to attend classes on one of the campuses?
- Do you drive a long distance to attend meetings on one of the campuses?
- Do you have personal issues that sometimes force you to miss class, such as:
 - A sick child?
 - Childcare issues?
 - A personal illness?
 - Transportation issues?

For more information regarding which courses can be taken via robot and how to register, please contact:
