## Nurse Educator Conference 2020

# Best Practice Strategies to Develop Clinical Judgment for Safe Practice, Licensure & NextGen!

This workshop incorporates numerous discussion sessions and hands-on strategies to implement the paradigm changes that are required to transform nursing education. These paradigm changes include the need to contextualize content so students can see why it is relevant to safe practice and clinical reasoning. Practical tools and strategies for active classroom learning, how to overcome faculty barriers to active learning, and application of clinical reasoning in clinical paperwork are included.

Lasting change requires more than tools. New ways of THINKING about nursing education also need to be embraced. A vision of transforming the nursing profession is communicated that includes discussing the cancer of incivility that remains all too common in nursing and nursing education. Practical strategies to directly and respectfully address incivility and bullying in both the academic and clinical contexts are discussed.
