## Survey of Assessment Culture - Student Affairs Scales <br> 06/30/2022

This document provides a summary of the results of the Student Affairs Survey of Assessment Culture, focusing on the four separate scales derived from its items. The scales were created and validated by Dr. Matthew Fuller and colleagues as described in Fuller and Lane (2017) ${ }^{1}$. Each scale consists of multiple individual survey items. In Fall 2019, survey administrators at Sam Houston State University invited 80 student affairs staff members from Southeast Community College to participate in the survey; 41 of them participated for a response rate of $51 \%$. In Spring 2022, student affairs 88 staff members were again invited to complete the Survey of Assessment culture and 51 SCC student affairs staff members completed the survey for a response rate of $58 \%$.

The scales in the Student Affairs Survey of Assessment Culture survey were validated by Fuller \& Lane (2017) using factor analysis. Factor analysis is a statistical technique for identifying underlying (unobserved / latent) characteristics that are difficult to measure (in this case 'assessment culture'). These analyses are achieved by grouping responses to multiple survey items that are correlated with each other. Fuller and colleagues identified four factors in the Student Affairs Survey of Assessment Culture. Those four factors, which are described later in the document, are:

- Assessment Communication
- Clear Commitment to Assessment
- Connection to Change
- Fear of Assessment

Respondents indicated how much they agree or disagree with each statement on a scale from 1 to 6 as shown in Table 1. Some items are stated in such a way that agreeing with the statement reflects a positive sentiment (e.g., I like chocolate), whereas agreeing with others indicates a negative sentiment (e.g., I dislike vanilla). The latter type of items were reverse coded in calculating the scale scores so high scores always correspond with positive sentiments (e.g., I do not dislike vanilla).

Table 1. Response set for survey

| Value | Text |
| :---: | :--- |
| 1 | Strongly disagree |
| 2 | Disagree |
| 3 | Only slightly disagree |
| 4 | Only slightly agree |
| 5 | Agree |
| 6 | Strongly agree |

Calculating the scale scores involved the following steps:

1. Identify items associated with each scale. The items included in each scale are detailed on the following pages.
2. Reverse code responses for specific items, as noted earlier. These items are denoted with an ' $R$ ' at the end of the variable name.
3. Calculate the average of the resulting scores for the items in the scale.
4. The resulting scale scores will range from 1.00 to 6.00 with higher scores representing a more positive sentiment for that factor.
[^0]
## Single scale results

This section of the report provides results for each scale. For each scale, the following content is provided:

- Brief description of the scale provided by Fuller \& Lane (2017).
- The distribution of scale scores with average (mean) score and standard deviation.
- The list of items included in the scale along with item-specific results.
- Notes about the results.

Because the item-specific results are complicated, the following provides an overview of what these charts include and how to understand them.

- These charts provide the items included in the scale presented in descending order of percentage point increase from 2019 to 2022.
- Four values are provided for each item: green bars indicate the percent who agreed with the statement; dark grey indicates the percent who disagreed; light grey bars indicate those who did not respond; the last values indicate the percent positive change (percentage points) from the 2019 survey to the 2022 survey.
- There is also an indicator noting if the change in positive sentiment from 2019 to 2022 is statistically significant (at $\mathrm{p}<.05$ ). If the change is marked as statistically significant, this means that we are $95 \%$ confident that the difference in positive sentiment from 2019 to 2022 was not due to chance.
- The axis in the first column of results splits the positive sentiments (right of axis) from the negative sentiments (left of axis).
- Since some items are reverse-coded, agreeing is not necessarily a positive sentiment. The image below provides two examples.
- For the first item below, 55\% of respondents disagreed (indicated by dark grey) that "Assessment results are NOT intended for distribution" and $25 \%$ agreed with the statement (indicated by green) in 2019. Because this item is reverse-coded, (noted with an '(R)' at the end of the statement) disagreement is a positive sentiment so disagreement (dark grey) is displayed to the right of the axis and agreement (green) to the left.
- For the second item below, $63 \%$ of respondents agreed (green) that "Assessment results are regularly shared throughout my institution" and $17 \%$ disagreed (dark grey) in 2019. Because the item is not reverse-coded, agreement is displayed to the right of the axis and disagreement is displayed to the left.

The histograms provide an overview of the distribution of respondents' average scores within each scale. Scale scores can range from 1 to 6 . The histogram displays what proportion of respondents' scale scores fall within the specified range.

- There is also an indicator if the change in average scale score from 2019 to 2022 is statistically significant.

## Assessment Communication Scale

Assessment Communication scale focuses on how frequently and how effectively assessment results are shared.

| Items for Assessment Communication Scale <br> Disagree <br> Agree <br> No response |  |  |  |  | Change in Positive sentiment |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |
| Assessment results are regularly shared throughout my division. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $44 \%$ $20 \%$ | $39 \%$ <br> 67\% | $\begin{aligned} & 17 \% \\ & 14 \% \end{aligned}$ | 27.6\% | * |
| Assessment success stories are shared throughout my division. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{array}{r} 54 \% \\ 29 \% \end{array}$ | $29 \%$ <br> 57\% | $\begin{aligned} & 17 \% \\ & 14 \% \end{aligned}$ | 27.6\% | * |
| Student affairs staff consistently receive assessment data from administrators. | 2019 <br> 2022 | $54 \%$ $37 \%$ | $22 \%$ <br> 47\% |  | 25.1\% | * |
| Communication of assessment results has been effective. | 2019 <br> 2022 | $\begin{array}{r} 41 \% \\ 29 \% \end{array}$ | $34 \%$ <br> 53\% | $24 \%$ <br> $18 \%$ | 18.8\% | * |
| Student assessment results are NOT regularly shared. (R) | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{array}{r} 54 \% \\ 33 \% \end{array}$ | $\begin{aligned} & 32 \% \\ & 49 \% \end{aligned}$ | $\begin{aligned} & 15 \% \\ & 18 \% \end{aligned}$ | 17.3\% | * |
| I am aware of several assessment success stories (i.e., instances of assessment resulting in important changes) in my division. | 2019 <br> 2022 | $\begin{aligned} & 49 \% \\ & 47 \% \end{aligned}$ | $\begin{aligned} & 27 \% \\ & 37 \% \end{aligned}$ | $\begin{aligned} & 24 \% \\ & 16 \% \end{aligned}$ | 10.4\% | $\varnothing$ |
| Assessment results are available from administrators by request. | 2019 <br> 2022 | 17\% <br> 18\% | $49 \%$ <br> 59\% | $\begin{aligned} & 34 \% \\ & 24 \% \end{aligned}$ | 10.0\% | $\varnothing$ |
| Assessment results are regularly requested by student affairs staff in my division. | 2019 <br> 2022 | $\begin{aligned} & 51 \% \\ & 53 \% \end{aligned}$ | $20 \%$ <br> 29\% |  | 9.9\% | $\varnothing$ |
| Upper student affairs administrators use assessment results in public ways (i.e., speeches, marketing efforts, media stories, etc.). | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{gathered} 32 \% \\ 25 \% \end{gathered}$ | $\begin{aligned} & 46 \% \\ & 53 \% \end{aligned}$ | $22 \%$ $22 \%$ | 6.6\% | $\varnothing$ |
| Assessment data are regularly used in official divisional communications (e.g., speeches, publications, etc.). | 2019 <br> 2022 | $\begin{aligned} & 29 \% \\ & 24 \% \end{aligned}$ | $46 \%$ <br> 51\% |  | 4.6\% | $\varnothing$ |
| Official divisional communications encourage assessment of student learning. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{aligned} & 29 \% \\ & 22 \% \end{aligned}$ | $\begin{aligned} & 49 \% \\ & 53 \% \end{aligned}$ | $\begin{array}{r} 22 \% \\ 25 \% \end{array}$ | 4.2\% | $\varnothing$ |

$\varnothing=$ results are not statistically significant; * $=$ results are significant at $\mathrm{p}<.05$ level

## Student Affairs survey - distribution of Assessment Communication scale scores

Some notes about these data:

- The Assessment Communication scale has the lowest average scale score out of all 4 scales.
- The Assessment Communication scale increased from 2019 (3.28) to 2022 (3.75). This increase was statistically significant.

## Clear Commitment to Assessment Scale

Clear Commitment to Assessment scale focuses on how committed the institution is to assessment and how the institution has implemented assessment practices.

| Items for Clear Commitment to Assessment Scale <br> Disagree Agree No response <br> Negative sentiment \| Positive sentiment No response |  |  |  |  | Change in Positive sentiment |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |
| Assessment is expected as part of my institution's continuous improvement process. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $46 \%$ | $54 \%$ <br> 92\% | $\begin{aligned} & 0 \% \\ & 0 \% \end{aligned}$ | 38.5\% | * |
| It is clear who is ultimately in charge of assessment in my division. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{array}{r} 51 \% \\ 8 \% \\ \hline \end{array}$ | $46 \%$ 82\% | $\begin{aligned} & 2 \% \\ & 10 \% \end{aligned}$ | 36.0\% | * |
| Upper student affairs administrators have made clear their expectations regarding assessment. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{aligned} & 49 \% \\ & 14 \% \end{aligned}$ | $49 \%$ $\square$ $76 \%$ | $\begin{aligned} & 2 \% \\ & 10 \% \end{aligned}$ | $27.7 \%$ | * |
| Assessment is an organized, coherent effort in my division. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $46 \%$ $20 \%$ | 39\% 67\% |  | 27.6\% | * |
| My division is structured in a way that facilitates assessment practices focused on improved student learning. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | 41\% <br> $18 \%$ | 41\% <br> 67\% | $\begin{aligned} & 17 \% \\ & 16 \% \end{aligned}$ | 25.2\% | * |
| Assessment is vital to my division's way of operating. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $39 \%$ $18 \%$ | $44 \%$ <br> 69\% | $\begin{aligned} & 17 \% \\ & 14 \% \end{aligned}$ | 24.7\% | * |
| There is no systematic approach to assessment in my division. (R) | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | 51\% 29\% | $34 \%$ 57\% | $\begin{aligned} & 15 \% \\ & 14 \% \\ & \hline \end{aligned}$ | 22.7\% | * |
| Assessment is emphasized as part of the division's culture. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{gathered} 32 \% \\ 12 \% \end{gathered}$ | 56\% <br> $78 \%$ | $\begin{aligned} & 12 \% \\ & 10 \% \end{aligned}$ | 22.3\% | * |
| Assessment processes yield evidence of my division's effectiveness. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $32 \%$ $16 \%$ | $66 \%$ <br> 80\% | $\begin{aligned} & 2 \% \\ & 4 \% \end{aligned}$ | 14.5\% | $\varnothing$ |
| The purpose of assessment is clearly understood at my institution. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{gathered} 29 \% \\ 16 \% \end{gathered}$ | $71 \%$ $80 \%$ | $\begin{aligned} & 0 \% \\ & 4 \% \end{aligned}$ | 9.7\% | $\varnothing$ |
| Official divisional communications encourage assessment of student learning. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{aligned} & 29 \% \\ & 22 \% \end{aligned}$ | $49 \%$ <br> 53\% | $22 \%$ $-25 \%$ | 4.2\% | $\varnothing$ |
| Assessments of programs are typically connected back to student learning. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{aligned} & 29 \% \\ & 25 \% \end{aligned}$ | $\begin{aligned} & 71 \% \\ & 71 \% \end{aligned}$ | $\begin{aligned} & 0 \% \\ & 4 \% \end{aligned}$ | -0.1\% | $\varnothing$ |
| Discussions about student learning are at the heart of my division's assessment effort. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{aligned} & 27 \% \\ & 24 \% \end{aligned}$ | $71 \%$ $71 \%$ | $\begin{aligned} & 2 \% \\ & 6 \% \end{aligned}$ | -0.1\% | $\varnothing$ |
| Assessments do not have clear focus. (R) | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{aligned} & 27 \% \\ & 25 \% \end{aligned}$ | $\begin{aligned} & 73 \% \\ & 71 \% \end{aligned}$ | $\begin{aligned} & 0 \% \\ & 4 \% \end{aligned}$ | $-2.6 \%$ | $\varnothing$ |

$\varnothing=$ results are not statistically significant; * $=$ results are significant at $p<.05$ level

Student Affairs survey - distribution of Clear Commitment to Assessment scale scores

Some notes about these data:

- The Clear Commitment to Assessment scale has the highest average scale score.
- The Clear Commitment to Assessment scale increased from 2019 (3.63) to 2022 (4.31). This increase was statistically significant.

## Connection to Change Scale

Connection to change scale focused on how likely assessment results drive change and the institution's decision making.

|  |  |  |  |  |  | Change in Positive |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Disagree Agree Noresponse | Neg | timen | sitive se | timent | No response | sentiment |  |
| A recommended change is more likely to be enacted if it is supported by assessment data. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{gathered} 39 \% \\ 12 \% \end{gathered}$ | 49\% <br> 78\% | $\begin{aligned} & 12 \% \\ & 10 \% \end{aligned}$ |  | 29.7\% | * |
| Decisions are made using assessment data. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $32 \%$ | 46\% <br> 73\% |  |  | 26.2\% | * |
| Assessment results are used for improvement. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{array}{r} 29 \% \\ 8 \% \end{array}$ | 49\% $\square$ 75\% |  |  | $25.7 \%$ | * |
| Assessment is vital to my division's way of operating. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{gathered} 39 \% \\ 18 \% \end{gathered}$ | $\begin{array}{r} 44 \% \\ 69 \% \end{array}$ | $\begin{aligned} & 17 \% \\ & 14 \% \end{aligned}$ |  | $24.7 \%$ | * |
| If assessment was not required, I would not be doing it. (R) | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $41 \%$ | $\begin{array}{r} 59 \% \\ 78 \% \end{array}$ | $0 \%$ <br> 2\% |  | 19.9\% | * |
| Change occurs more readily when supported by assessment results. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $27 \%$ $16 \%$ | 51\% <br> 67\% |  |  | 15.4\% | $\varnothing$ |
| Assessment processes yield evidence of my division's effectiveness. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $32 \%$ <br> $16 \%$ | $\begin{aligned} & 66 \% \\ & 80 \% \end{aligned}$ | ${ }_{4 \%}^{2 \%}$ |  | 14.5\% | $\varnothing$ |
| Assessment data are used to identify the extent to which student learning outcomes are met. | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{gathered} 22 \% \\ 18 \% \end{gathered}$ | 51\% <br> 59\% | $27 \%$ $24 \%$ |  | 7.6\% | $\varnothing$ |
| Upper student affairs administrators use assessment results in public ways (i.e., speeches, marketing efforts, media stories, etc.). | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{aligned} & 32 \% \\ & 25 \% \end{aligned}$ | $46 \%$ <br> 53\% |  |  | 6.6\% | $\varnothing$ |
| Assessment data are regularly used in official divisional communications (e.g., speeches, publications, etc.). | $\begin{aligned} & 2019 \\ & 2022 \end{aligned}$ | $\begin{aligned} & 29 \% \\ & 24 \% \end{aligned}$ | 46\% <br> 51\% | $24 \%$ $25 \%$ |  | 4.6\% | $\varnothing$ |

[^1]Student Affairs survey - distribution of Connection to Change scale scores

Some notes about these data:

- The Connection to Change scale has the $2^{\text {nd }}$ highest average scale score.
- The Connection to Change scale increased from 2019 (3.77) to 2022 (4.29). This increase was statistically significant.

## Fear of Assessment Scale

Fear of Assessment scale explored the extent to which student affairs staff believe that assessment is used for punishment or compliance.

$\varnothing=$ results are not statistically significant; * $=$ results are significant at $p<.05$ level

Student Affairs survey - distribution of Fear of Assessment scale scores

$\varnothing=$ results are not statistically significant; * $=$ results are significant at $p<.05$ level

Some notes about these data:

- The Fear of Assessment scale has the $2^{\text {nd }}$ lowest average scale score.
- The Connection to Change scale slightly decreased from 2019 (4.14) to 2022 (4.13). This decrease was not statistically significant.

## Comparison of all scales

This section provides an overview of all five scales and how they compare. Error! Not a valid bookmark self-reference. following chart shows the distribution of scale scores in 2019 as a histogram (light grey) and in 2022 (blue) as a histogram. It is important to notice the relative shape and symmetry of the score distributions with the average as the midpoint.

| The purpose of assessment aligns with my personal values. | 2022 | 8\% | 67\% | 25\% |
| Concerns and questions regarding assessment are addressed at my institutio.. | 2022 | 12\% | 65\% | 24\% |
| Ample time is given to learn and apply assessment skills at my institution. | 2022 | 20\% | 55\% | 25\% |
| Assistance in performing assessment is available. | 2022 | 20\% | 55\% | 25\% |
| Training is available on how to do assessment at my institution. | 2022 | 27\% | 49\% | 24\% |
| Assessment is incentivized in my department. | 2022 | 51\% |  | 27\% |

## III. Additional scale descriptive statistics

The table below displays descriptive statistics for each of the student affairs scales. Standard deviation is a measure of how widely dispersed the scores are. A low standard deviation indicates that scores are densely distributed close to the mean. A large standard deviation indicates that scores are dispersed at a wider range. Because not every student affairs staff member completed the survey, the results here are based on a sample. We then use sample results to estimate the population mean. The confidence intervals are estimates of the range of the population mean.

|  | Average Score | Scale <br> Standard <br> Deviation | Lower bound <br> $(95 \%$ <br> confidence) | Upper bound <br> $(95 \%$ <br> confidence) |
| :---: | :---: | :---: | :---: | ---: |
| Assessment Communication Scale <br> Clear Commitment to Assessment <br> Scale | 3.75 | 1.00 | 3.45 | 4.05 |
| Connection to Change Scale | 4.31 | 0.75 | 4.10 | 4.52 |
| Fear of Assessment Scale | 4.29 | 0.75 | 4.08 | 4.51 |

## IV. Analysis of missing data

There were 51 student affairs staff who began the survey. The number of missing values for survey items ranged from $0-17$. Due to the small number of survey respondents, missing data can represent a substantial proportion of the outcome ( 17 missing values out of 51 respondents is $33.3 \%$ ). Because this survey has a small number of respondents and relatively high proportion of missing values, it is important to use caution when making inferences about the population of student affairs staff at SCC.
