

**SOUTHEAST COMMUNITY COLLEGE
PHARMACY TECHNICIAN TRAINING PROGRAM**

NAME: _____

Professional Awareness – Job Shadowing

One of the best ways to learn about a profession is to job shadow someone. You want to be a technician? That's awesome, but do you know what a technician actually does on a day-to-day basis? Your assignment is to contact a pharmacy (set this up with the pharmacy manager): retail, hospital, compounding, or long-term care and to set up a 1 hour job shadow. You are going to shadow a pharmacy technician. The technician has to have worked at the pharmacy longer than 1 year.

COMPLETE BEFORE SHADOW 1:

1. How are you feeling about this experience?

2. What do you think are some responsibilities of a technician in this setting?

3. COMPLETE AFTER SHADOW:

1. Please provide the following information about the site:

- a. Facility Name: _____
- b. Location and Phone Number: _____
- c. Technician Name: _____
- d. Technician's Years of Employment: _____
- e. Technician's Training: _____

2. From what you can gather, what are some of the technician's responsibilities?
