

Personality + Career

You will be successful in our diesel programs if you enjoy learning how things work, work well independently, want an active job, and are detail oriented. More than 100,000 technicians will be needed in the next few years. The industry is actively seeking highly skilled, highly knowledgeable, motivated problem-solvers to fill those needs.

Program	Credential	What you'll learn!	What you'll earn!	Career Opportunities	Certificate Preparation	Required Tools, Supplies, and Uniforms
Diesel-Ag Equipment Service Technology	Associate of Applied Science	Students will learn the theory and operation, diagnosis, service and repair of all aspects of agricultural equipment, including precision guidance systems, as well as planting, spraying and harvesting machines. This includes engines, fuel systems, electronics, HVAC, hydraulics, steering and suspension systems, along with several different powertrain systems. Students will also gain basic welding skills.	\$22.30 per hour; \$46,384 annually	Ag Diesel Technician Service Technician	Forklift Operator Certification Section 609 HVAC Certification	Tools are required. See required list. Uniform shirts are required and can be purchased through the Campus Store.
Diesel Technology - Truck	Associate of Applied Science	Students will learn the theory and operation, diagnosis, service and repair of all aspects of a heavy duty truck. This includes engines, fuel systems, electronics, HVAC, braking, steering and suspension systems, along with several different powertrain systems. Students will also gain basic welding skills.	\$21.25 per hour; \$44,200 annually	Diesel Technician Service Technician	Our ASE accreditation provides one year of the required two years of work experience needed to earn ASE certification. Forklift Operator Certification Section 609 HVAC Certification	Tools are required. See required list. Uniform shirts are required and can be purchased through the Campus Store.

Diesel Programs

- Diesel Technology-Truck
- Diesel-Ag Equipment Service Tech

» southeast.edu

Our diesel programs provide you with unique training opportunities, preparing you to begin a high-paying career as a diesel technician. You'll develop skills through hands-on work on a variety of diesel equipment. Based on which program concentration you choose, you may work on diesel construction equipment, ag equipment or trucks. Both concentrations include air conditioning, fuel systems, diesel engines, electrical systems, hydraulics and power trains. The diesel programs both utilize industry-sponsored equipment, tools and resources that are typical of modern dealership service requirements.

Southeast Community College is proud of our industry partnership with Crete Carrier, who assisted with the construction of our new Diesel Technology & Welding Center.

Sponsorships are not required for our diesel programs, but numerous opportunities exist. Many industry partners provide student assistance through sponsorships and scholarships that may provide tuition, fees, books, tools, and summer internships.

The Diesel-Truck program is accredited by the ASE Education Foundation, 1503 Edwards Ferry R., NE, Ste. 401, Leesburg, VA 20176, 703-669-6650, aseeducationfoundation.org

The SCC Experience

- » Receive hands-on education in our state-of-the-art facility on diesel construction equipment, ag equipment or trucks, including air conditioning, fuel systems, diesel engines, electrical systems, hydraulics and power trains. The Crete Carrier Diesel Technology & Welding Center opened in January 2020 and is one of best educational facilities in the Midwest.
- » SCC's Diesel Technology programs are hands-on. Students will spend 70-75% of their time in the lab working on projects and live equipment. This experience is valuable in helping students excel in their future careers.
- » An 8-week paid co-op will be completed during the summer between first and second year. Students get to choose who they want to intern with, and our instructors assist with placement when needed.
- » Service technician opportunities are endless as they can work on a wide variety of equipment, from firetrucks to large construction equipment. The career offers tremendous opportunities in pay and benefits, and jobs are always available. The programs work closely with SCC's Career Services Office to bring employers to campus and post jobs.

Program	Credential	Location	Credit Hours	Tuition/Fees*	Books/Fees/Supplies	Tools	Total Cost*	Starting Term(s)	Number of Semesters Required - Full Time	Is Summer Term Required for Full Time?	Typical Class Schedule
Diesel Ag-Equipment Service Tech	Associate of Applied Science	Milford	70	R - \$8,470 NR - \$9,940	\$1,799	\$9,480	R - \$19,749 NR - \$21,219	Fall Spring	4	Yes	Monday-Thursday: 8 am - 4 pm Friday: 8 am - Noon
Diesel-Truck	Associate of Applied Science	Milford	70	R - \$8,470 NR - \$9,940	\$1,328	\$9,480	R - \$19,278 NR - \$20,748	Fall Spring	4	Yes	Monday-Thursday: 8 am - 4 pm Friday: 8 am - Noon

*R=Resident, NR=Non-resident. Costs listed are estimates and are subject to change based on the market price of books, supplies, tools, uniforms, etc. Estimated costs also include tuition and fees. Additionally, days/times of week for class, lab, clinical/practicum are subject to change based on curriculum, facilities, instructor, and site availability. Actual program schedules will be provided prior to each enrolled term.

There is no Part-time or Online option for these Programs of Study.

TOOLS

Many tools are provided and students are only asked to purchase minimum tools in their first term, giving them time to explore and learn. Students then add to tools in future semesters. Tools are an investment in a student's career and SCC works with a variety of tool vendors to give students options. Many vendors offer students a significant discount. Students can also purchase tools from other vendors not associated with the College. Program faculty and advisors will provide students with specific information related to tools prior to the start of their first semester.

During the first week of each semester, tool vendors come to campus and provide students with options to buy single tools or tool sets based on program needs. Faculty will be available to help students make selections based on course and program needs.

Diesel Programs' - Required Basic Tool List

The following tool list includes the basic tools and supplies a student will be required to have the first day of class.

The student should discuss with their advisor the timeline for purchasing specific tools and suggested optional tools.

The College does not recommend, nor endorse, any specific brand of tools. The student should give careful consideration when selecting tools he/she will use in their career.

FIRST DAY OF CLASS

- Safety Glasses (Min. Z-87 Rated)
- Leather Safety-Toe Boots
- Hearing Protection (Ear Plugs)
- Flashlight
- Pocket Screwdriver
- Inspection Mirror
- Telescoping Magnetic Pickup Tool
- 4-Piece Pick Set
- Rubber Tip Air Nozzle
- Tire Pressure Gauge (At Least 120 Psi)
- Tire Inflator Air Chuck
- Valve Core Tool
- Fluke 87 Multimeter
- 12v Test Light
- Wire Crimper/Stripper
- Coolant Tester
- Battery Terminal Cleaner
- Battery Terminal Removal Tool
- Tool Bag

FIRST DAY OF WELDING CLASS

- Auto Darkening Welding Helmet W/ Ability For Shade Setting 5 or Separate Shade 5 Grinding Shield
- Long Sleeve Welding Jacket
- Denim or Cotton Jeans With No Holes
- Welding Gloves
- Welper (Welding) Pliers
- Slip Joint Pliers

These tools/supplies are available at the Campus Store or through other retailers.

To complete the program, students will need to purchase additional tools for the first day of the second semester. Tools may be purchased with a significant discount through vendors that come to campus (or on their own.)

The full list of required and recommended tools is available on the programs' web page.
