

Personality + Career

GM ASEP students enjoy working with their hands and can stay on task to complete a job. They have mechanical ability and computer and communication skills. The ability to follow directions, work on a team, and visualize objects three dimensionally is also important. Additionally, they are good team members and are detail oriented.

General Motors Automotive Service Educational Program

If you like to diagnose issues, make repairs and enhance vehicle performance, do what you love and turn it into a rewarding career! Join SCC's General Motors Automotive Service Educational Program! This program is a partnership between Southeast Community College and General Motors and its dealerships, designed to prepare you as a highly qualified entry-level technician at a General Motors dealership after you graduate.

Through a carefully constructed program of classroom and experience-based education, you'll gain knowledge of current General Motors engine fundamentals, propulsion systems, electrical and electronic principles, fuel systems, brakes, steering and suspension systems, body computer systems, transmissions, and heating and air conditioning systems.

This program is accredited by the ASE Education Foundation, 1503 Edwards Ferry Rd., NE, Ste. 401 Leesburg, VA 20176, 703-669-6650, aseeducationfoundation.org.

The SCC Experience

- » SCC’s program is the only GM ASEP school in Nebraska. This unique program combines educational training and industry work experience in a true earn-while-you-learn setting. Students complete two eight-week cooperative experiences at their sponsoring dealership during the program, giving them the opportunity to apply what they learn in the classroom on live customer work.
- » The GM ASEP program is hands-on. Students spend 60% of their time in the lab using special factory tools and online General Motors resources while working on late-model vehicles donated by GM.
- » Automotive Service Excellence (ASE) offers SCC students who complete the GM ASEP program credit for one year of the two-year requirement to become an ASE certified technician. This certification acknowledges graduates’ level of training and provides opportunity for higher earning potential.
- » Learn from the best. The SCC GM ASEP instructors are among the best. They bring industry experience to the classroom and prepare students to diagnose and repair General Motors products from bumper to bumper. Small class sizes give students ample opportunity for one-on-one attention and access to equipment for learning.

Additionally, days/times of week for class, lab, clinical/practicum are subject to change based on curriculum, facilities, instructor, and site availability. Actual program schedules will be provided prior to each enrolled term.

No summer term is required for full-time students. Program classes must be taken in person.

TOOLS

Many tools are provided and students are only asked to purchase minimum tools in their first term, giving them time to explore and learn. Students then buy the rest of their tool set prior to second semester. Tools are an investment in a student’s career and SCC works with a variety of tool vendors to give students options. Many vendors offer students a significant discount. Students can also purchase tools from other vendors not associated with the College. Program faculty and advisors will provide students with specific information related to tools at the start of their first semester.

During the first week of each semester, tool vendors come to campus and provide students with options to buy single tools or tool sets based on program needs. Faculty will be available to help students make selections based on course and program needs.
