

Improve cellular connectivity

Some areas of our campuses do not receive strong cell signal. This can cause issues with voice calls, text messages, and authenticator apps. Most phones can use “Wi-Fi Calling” to avoid these issues.

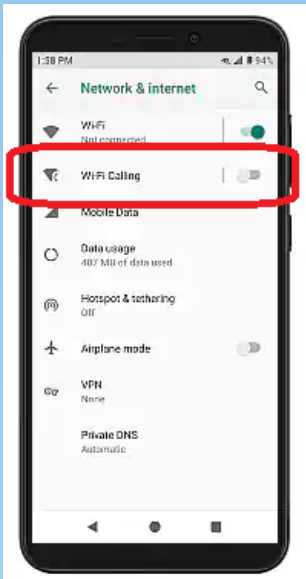

Connect to the 'eduroam' Wi-Fi network

1. Enter your username. Use the ab12345@southeast.edu format
2. Enter your usual SCC password
3. Select “trust” or “trust on first use” if prompted

Enable Wi-Fi Calling

On an Android phone...

1. Select Settings > Network & internet*
2. Toggle-on “Wi-Fi Calling”
3. Enter an emergency contact address if prompted

On an iPhone...

1. Select Settings > Cellular > Wi-Fi Calling *
2. Toggle-on “Wi-Fi Calling on this iPhone”
3. Enter an emergency contact address if prompted

*The location of this setting may vary depending on the model and operating system of your phone. Try searching within the settings app for “calling”
