A0713 - DCFE REV1 (12/19)

SCC has a great partnership with Deere Construction & Forestry, and this program prepares students to be entry-level service technicians within the dealerships. Graduates typically continue employment with their sponsoring dealership. Students are in the classroom and lab at the Milford Campus, but also apply what they've learned at the sponsoring Deere Construction & Forestry dealership.

Students take courses through John Deere University and will successfully complete Levels 1 & 2 Construction & Forestry Equipment classes to qualify for graduation. These classes are assigned throughout the student's training.

When I attended the Deere Construction and Forestry Equipment Tech program at Southeast Community College, I was met with nothing but energy and enthusiasm. The faculty and staff at this institution are top rate and want their students to be successful. The instructors and staff provided me with the help I needed to achieve my goals. I received

training developed specifically for Deere Construction equipment technicians.

The specialized training I received prepared me for my career as a technician. This gave me an advantage as I stepped into my career. I had a head start and was prepared to join the Deere team. This school puts students first. I am so glad I made the decision to attend this program at SCC."
