**AUTO COLLISION REPAIR TECHNOLOGY**

**Milford Campus**

Turn your love of working with your hands and fixing things into a career with a degree in Auto Collision Repair Technology from SCC. Skilled graduates receive real-world, hands-on, live-lab project experiences, many job opportunities and discounted tools. As vehicles become more complex and valuable, the trained technician that can repair them is in high demand. As graduates gain experience, some become business owners in our communities hiring the next generation of technicians.

The program is certified by the National Automotive Technicians Education Foundation. The program offers Platinum Class certification through I-CAR (Inter-Industry Conference on Auto Collision Repair) using the Professional Development Program™ - Education Edition. Students also can become welder-certified in both steel and aluminum through I-CAR.

“SCC grads show up ready to work day one. The skills and knowledge they have gained in the programs allow them to fit right in. Our SCC grads have made great additions to the team and we hope to continue this relationship in the future.”

-Emily Workman, Human Resources  
B Street Collision, Omaha

**SCC is the Right Choice**

- Live lab projects. Most of the vehicles used in training are student- or customer-owned projects. These vehicles have real-world damage and need to be fixed right as they will go back into service. This gives you relevant lab work that isn’t always present when using mock-up projects or school-owned components. It also helps you learn about estimates, repair orders, parts procurement, and customer interaction and satisfaction.
- We use industry standard equipment, including six current bake paint booths, two frame repair machines and a paint mix room.
- You have the opportunity to pursue a related degree in Automotive Technology.

**Top Career Options**

- Auto Body Technician
- Collision Technician
- Paint Specialist

**Graduate Earnings**

Recent graduates report an average starting salary of $32,032 per year.
