Equal Opportunity/NonDiscrimination Policy - It is the policy of Southeast Community College to provide equal opportunity and nondiscrimination in all admission, attendance, and employment matters to all persons without regard to race, color, religion, sex, age, marital status, national origin, ethnicity, veteran status, sexual orientation, disability, or other factors prohibited by law or College policy. Inquiries concerning the application of Southeast Community College's policies on equal opportunity and nondiscrimination should be directed to the Vice President for Access/Equity/Diversity, SCC Area Office, 301 S. 68th Street Place, Lincoln, NE 68510, 402-323-3412, FAX 402-323-3420, or jsoto@southeast.edu. This publication should not be considered a contract between SCC and any prospective student. SCC's Board of Governors reserves the right to make changes in this publication during the life of the publication and without notice.
A0733 - LSCE (08/20)

Have you ever noticed someone in a hardhat with a tripod standing by the side of a road or property? If so, you probably wondered what that person was doing. That person was most likely a land surveyor, and he or she was probably taking a variety of precise measurements with specialized surveying equipment to determine exactly where property boundary lines were located. SCC's Land Surveying/GIS/Civil Engineering Technology program offers a unique combination of instruction that will prepare you for a career as a land surveyor, civil drafter or construction material inspector.

SCC is the Right Choice

This is the only land surveying program in Nebraska.

- Upon completion of the program, you'll qualify for a nine-month work experience toward obtaining your Registered Land Surveyor license.
- Your final semester will be the Cooperative Education Experience where you will be employed performing land surveying, drafting or materials testing/inspecting throughout Nebraska and surrounding states.

"Coming from the surveying world prior to attending the SCC Land Surveying/GIS/Civil Engineering Technology program, I was well aware

of its long-standing reputation for producing capable surveyors, regardless of experience, as well as providing in-depth training to experienced surveyors like myself on the new technologies available to our industry.

The small classes offer plenty of hands-on time in the field with ample guidance when needed. This environment also helps form excellent working relationships with fellow surveyors and future teammates. The campus is small-town based with good facilities that maintain the Nebraska values that no other school offers."

-Josh Gilbertson, Current Student
