YOUR FUTURE. YOUR CHOICE.

www.southeast.edu/horticultureturfgrassmanagement

CHOOSE YOU!

If you are interested in filling tables with safe and nutritious food, preserving native habitats and lessening the impact of climate change, bringing landscapes to life, or pursuing a career as a turf specialist for golf courses and athletic fields, SCC's Horticulture & Turfgrass Management program is for you. What's cool about our program is there are hundreds of career pathways to choose from upon graduation.

In our program you will gain a strong foundation in soil and plant nutrition, plant selection, pest management, and irrigation and water management. This knowledge equips our graduates with technical expertise and problem-solving skills, allowing them to create beautiful, functional and healthy landscapes for communities, businesses, recreational and residential use, and displays.

SCC is the Right Choice

- Our program combines classroom theory with hands-on experience in various settings throughout the Beatrice Campus, including two golf course holes and a new soccer field.
- Students participate in a Cooperative Experience, helping them gain on-the-job training, further preparing them to make an immediate impact in the industry!
- We offer a transfer pathway to Kansas State University, where you'll complete a bachelor's degree in Agricultural Education.

"The Southeast Turfgrass program is a true game-changer. I graduated ready to transition into an assistant/superintendent from day one thanks to a knowledgeable staff, as well as a well-rounded, hands-on course curriculum."

-Scott Parrott, Golf Course Superintendent, Kearney Country Club

Credit hours required for graduation:

Horticulture and Turfgrass Management - Horticulture Focus
»Associate of Applied Science66

Horticulture and Turfgrass Management - Turfgrass Management Focus
»Associate of Applied Science66
