CHOOSE YOU!

A career in livestock management provides many options, including the direct care of animals, operation management, sales, feed and nutrition consulting and education, animal health, and beyond. The work in this industry provides variety, flexibility and the opportunity to work with others and to ensure a safe and quality life for animals and our world's food supply.

Livestock managers are responsible for running the business of livestock on farms or ranches. They must keep accurate financial records, supervise workers and ensure the proper care of animals. They make sure that the goods from animals are produced safely, efficiently and profitably by monitoring what the livestock is fed, keeping the animals healthy and ensuring overall cleanliness of animals and facilities.
