The Early Childhood Education program provides you the opportunity for a high-quality education to enter the workforce and impact the lives of young children and families. We're excited to have you be a part of our program!

Early Childhood is a field that is currently struggling to meet the demands of the workforce. Nationwide there is a need for early care educators that are knowledgeable in the needs of young children and view the field as a career choice that is essential in our communities. Our graduates are quickly joining the workforce and often have employment when completing practicum experiences.

The Associate of Applied Science degree at SCC is accredited by the Commission on the Accreditation of Early Childhood Higher Education Programs of the National Association for the Education of Young Children. The current accreditation term runs from March 2021-August 2023.

# The SCC Experience

- » We are very active in our early childhood community locally, within our state and on the national level. Students have the opportunity to become involved in our SCC Early Childhood Student Group that enhances their leadership skills and helps them begin to recognize themselves as part of a professional community.
- » Our program has highly qualified faculty who have all taught either in public schools, worked in child care or served in administrative roles in the field of early childhood. Our staff has strength in theory of early childhood and in practice (planning and implementing curriculum).
- » Associate of Applied Science degree students earn more than 300 hours of field experience, giving them direct experience working with young children.
- » Our program offers a student teaching experience that serves as a capstone to the Associate Degree program. Field work hours are completed in classrooms that serve children with special needs, as well as community service hours in agencies that serve children and families. These unique experiences set SCC graduates apart!
- » Our program offers flexibility to help you meet your goals! The program can be completed in person, fully online, or with a combination of in-person and online classes.

Program	Credential	Location	Credit Hours Required	Resident cost*	Non- Resident cost*	Starting Term(s)	Number of Semesters Required - Full Time	Is Summer Term Required for Full Time?
