Black Rocket Youth Camp: Make Your First 3D Video Game

Try this new version of a Black Rocket classic! This class allows you to develop a game concept that goes well beyond the limitations of the traditional 2D game design classes and create an immersive 3D world. Students will learn the physics behind 3D games, explore beginner event scripting, level design, controlling flow of gameplay, and story telling. Student created games will be available on a password protected Black Rocket website to share with friends and family. Students will work in pairs or teams for most of the program.

Black Rocket Youth Camp: Minecraft© Designers

If you love the game Minecraft©, and always wanted to design your own world, this class is for you! Learn how to create a custom map, the basics of creating 3D models using a new software to design your very own objects, how to build with Redstone and Command blocks, and create custom textures for you to import at home or share with friends. To access their project at home, students must own a PC/MAC version of Minecraft©. Tablet, phone, and game console versions of Minecraft© are not compatible. Parent email address is required to use 3D modeling software. Students will work in pairs or teams for most of the program.
