Jobs in the automotive service industry are always in demand. Learn from experts at SCC and GM in our joint program. Students must secure a General Motors dealer or ACDelco service center to sponsor them during training.

Program Overview:

Students spend four quarters full-time on the Milford Campus and the remaining three quarters working in a GM dealership or ACDelco service center.

Through a carefully constructed program of classroom and experience-based education, students gain knowledge of engine fundamentals, electrical and electronic principles, fuel systems, brakes, steering and suspension systems, body computer systems, transmissions, and heating and air conditioning systems. Students have access to new products and equipment necessary for proper and accurate diagnosis of current GM systems. They also receive regular updates on all new GM products to stay current with industry progress.

This SCC program is Affiliated with ASE. Master Accreditation by NATEF. This program is accredited by the National Automotive Technicians Education Foundation, 101 Blue Seal Drive, Suite 101, Leesburg, VA 20175, 703-669-6125, www.natef.org.

Students are required to provide or purchase a basic tool set during the first quarter. Students are required to wear program uniforms while in classroom or laboratory settings.
