"I chose the Precision Machining and Automation Technology program because the job opportunities once I graduate will be amazing. I have had a job lined up since my third quarter of school.

The company I have worked for while I'm still in school heard that I was going to SCC for precision machining. It knew that SCC was a really great school and that I could improve their machine shop. The new program area at SCC is really nice. The new machines give students more opportunities to learn the CNCs and get more hands-on time with them."
